Rocky August 2011

Rocky is a 93% foundation bred American **homozygous** (meaning that he will actually reproduce the spotted colour in his offspring!) sorrel few spot appaloosa stallion, **imported directly from France**. Rocky has **size, temperament,**

bloodlines, conformation and movement to become a superb sport horse of note. Rocky's bloodline boasts some of the finest Proven champion show, Halter, and Top Performance horses of all time. Rocky's bloodline is unique in South Africa and exclusive to the Painted Appaloosa Stud. Rocky has proven himself to be a top producer that sires foals consistently with good qualities to most type mares. He also adds that refined, doll face to all his foals with exceptional colour.

Rocky has a lot of character and we have formed such a strong bond with this horses that I doubt he will ever leave the stud. He loves to play/show off and one can only appreciate this horse's beauty in real life. He is amazing to watch.

His foals from Thoroughbred, American QuaterHorse and pure Arabian mares may be eligible for registration with the Appaloosa Horse Club in Moscow, Idaho as well as the Appaloosa Horse Breeders Society of South-Africa.

Rocky is in the process of classical dressage training and will start his ridden career in the next 2 years.

He has sired 5 filly foals up to date that are truly exceptional. Make sure to have a look at them on the 2008/2009 foal page. We are proud to announce that Rocky has sired his first colts, have a look at them on our 2010 foal pages. A few of his offspring:

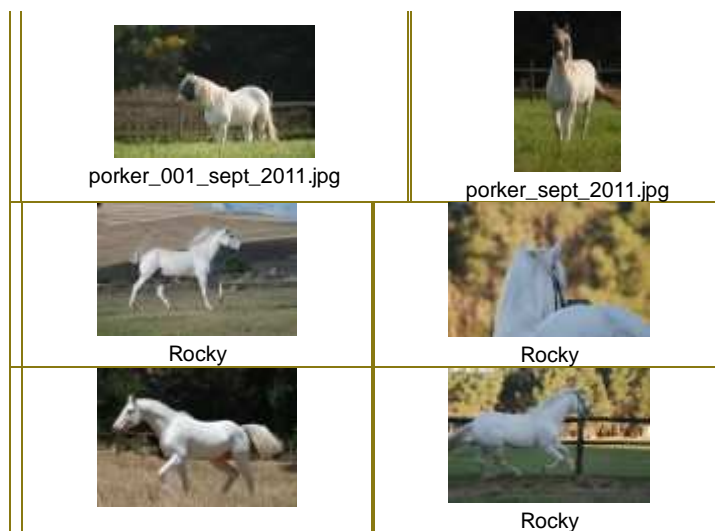

For more information regarding this magnificent stallion please contact the Painted Appaloosa stud.
